Education

University of Macau (UM) — Macau SAR, China
Bachelor of Social Sciences in Government and Public Administration (International and Public Affairs) — *Aug 2023–present*

- Cumulative GPA: 3.72/4.00 (Top 10%); Indicative Australian WAM: 91.6/100 (Estimated)
- Methodological Training: Social Sciences Research Methods (A), Quantitative Reasoning for Social Sciences (A), Statistics (A), Game Theory (A), Political Economy and Formal Theory (A), Data Science with R (A-), etc.
- Selected Substantive Coursework: Asian Politics: Comparative Political Economy and Development (A), The Rise of Asia: Political Economy and International Relations (A), Public Administration in China: State, Bureaucracy and Political Economy (A), International Organizations and World Governance (A), Understanding Government (A), etc.

National University of Singapore (NUS) — Kent Ridge, Singapore
Summer School on Singapore, Asia and the Global Economy — *Jun 2026–Jul 2026*

London School of Economics and Political Science (LSE) — London, United Kingdom
Summer School on Statistics and Data Analysis — *Jun 2024–Jul 2024*

Working Paper

Organizational Background and Post-Exit Misconduct in China — [Full Abstract]
Undergraduate Thesis, University of Macau — *Manuscript Completed*

- Constructed and coded a dataset of 103 post-exit disciplinary cases from 1,987 official announcements in China, applying logistic regression, standardized predicted probabilities, and sensitivity analyses.
- Found occupational activity 57.4 percentage points higher among state-enterprise cases and former-office influence 34.9 points higher among public-institution cases; differences persisted among retirees and across specifications.
- Extended organizational explanations of revolving-door careers to post-exit misconduct, connecting research on corruption and political networks through a systematic comparison of employment and continuing influence.

Research Experience

Empirical Social Science, Research Design, and Advanced Methodology — Coordinator: Prof. Tao Li
Public Affairs and Political Economy Research Workshop (PAPER) — *Aug 2025–present*

- Participate in a research seminar involving close reading and discussion of frontier scholarship in economics, political science, and methodology, with emphasis on research design, causal inference, and survey experiments.
- Delivered multiple paper presentations on topics including bureaucratic corruption, authoritarian information politics, and political leadership, with discussions covering diverse research approaches including formal theory, latent class analysis, text analysis, and survey experiments.
- Develop independent research projects and regularly present work in progress to the group.

Computational Social Science, Policy Process, and Lawmaking in China — Supervisor: Prof. Jiying Jiang
Research Assistant, Department of Government and Public Administration, University of Macau — *Aug 2024–Aug 2026*

- Constructed and maintained an original legislative dataset covering 486 NPC laws and 381 public consultation records, involving the digitization, cleaning, and structuring of draft versions and final enacted texts for 98 laws adopted through a two-phase lawmaking process.
- Developed R-based text processing workflows to identify and track article- and paragraph-level revisions between legislative drafts and final texts using cosine similarity and Jaro–Winkler string distance, contributing to a text-based dataset for studying legislative politics and policy processes in China.

Social Network Analysis and Regional Governance in China — Supervisor: Prof. Shuwen Zhang
Summer Research Training and Workshop, University of Macau — *Jun 2026–Jul 2026*

- Received methodological training in social network analysis, covering network construction, centrality measures, community detection, and network visualization.
- Collected large-scale administrative data on intergovernmental cooperation among Chinese local governments from multiple sources, cleaned and structured 747 observations, and applied social network analysis techniques to examine patterns of collaboration.

Construction of the Chinese Legislative Texts and Procedural Transparency Dataset — PI: Prof. Jiying Jiang
Undergraduate Summer Researcher, University of Macau — *May 2025–Aug 2025*

- Selected for the UM's competitive Undergraduate Summer Research Program as the project's sole student researcher.
- Conducted intensive summer research on legislative transparency and bill revision, contributing to dataset construction and text processing for an ongoing study of the lawmaking process in China.

Selected Research Projects

Rewiring Factory Asia: Understanding the Changes in Asian Production Networks Grade: A+
Singapore, Asia and the Global Economy (NUS) *Descriptive Empirical Research*

- Synthesized trade and investment evidence to document shifts in Asian global value chains amid trade tensions, geopolitical shocks, and changing production costs, assessing production relocation and the evolving positions of China, Southeast Asia, and Singapore within regional production networks.

Formal Models of Policymaking and Bureaucratic Corruption in China Grade: A
Public Administration in China (UM) *Formal-Theoretic Research*

- Co-authored two research papers using formal game-theoretic models of Chinese governance: one uses a three-agency coordination game and comparative statics to analyze emission-reduction policymaking under fragmented authoritarianism; the other uses a bureaucrat–regulator repeated game to explain how institutional incentives sustain corruption as an equilibrium outcome.

Progress or Retreat? Evaluating the IMF's Role in Domestic Income Inequality Grade: A
International Organizations and World Governance (UM) *Quantitative Empirical Research*

- Constructed a panel dataset of 100 low- and middle-income countries and used multivariable regression, lagged specifications, and interaction models to examine the relationship between IMF programs and income inequality, including how domestic fiscal capacity conditions their distributive consequences.

Refugees, Cultural Distance, and the Rise of the Far Right in Germany Grade: A
Social Sciences Research Methods (UM) *Quantitative Research Design*

- Developed a quantitative research design using German federal election data, weighted cultural-distance measures, time-decay event indicators, and multivariable regression with spatial and time fixed effects to examine how refugee exposure and cultural differences shape support for the AfD.

Academic Service & Engagement

Head of Academics, Youth Association of International Affairs, University of Macau	*Aug 2025–present*
Academic Officer, Youth Association of International Affairs, University of Macau	*Sep 2023–present*
Member of Selection Committee, University of Macau Internal Selection for the 5th WCMDNC	*Oct 2026*
Delegate, Asia Pacific Week Conference, Australian National University	*Jun 2026*
Question Writer, Macau International Knowledge Contest	*Spring 2024–2026*
Delegate, University of Macau Model United Nations Conference	*Nov 2023*

Awards & Honors

Golden Lotus Full Scholarship for Admission Examination, University of Macau	*2023–2027*
Dean's Honor List, Faculty of Social Sciences, University of Macau	*2023–2026*
Ten Thousand People's Scheme Nomination for FISS, Fudan University & University of Macau	*2024*
Member of Honours College, University of Macau	*2023–2024*

Skills

Languages: English (fluent), Mandarin Chinese (native)

Software: R, Quarto, LaTeX, GitHub
